## DDC Wireless

The SensorStat® Wireless DDC system complements our range of DDC series and is the first step to a fully integrated intelligent wireless room. You get the features of an on-line system at the price of stand-alone. By being wireless, this system will enable installation in retrofit situations where holes cannot be made in the walls - or where the installation cost previously proved to be prohibitive due to construction materials or union issues.

## System Features

Onity DDC Wireless features state-of-the-art contactless technology, giving a "tech-touch" to your property.

- 25-35% Average Reduction In HVAC Runtime\*
- Battery Powered - Install Anywhere
