

# Dictaphone installation for HK's new stock exchange

A Dictaphone 160-CH recording system has been installed at Hong Kong's new unified Hong Kong Stock Exchange in order to keep timed, accurate records of all verbal financial transactions.

Supplied and installed by Systems at the Hong Kong Stock Exchange Limited's new premises in the prestigious Exchange Square commercial complex, the Dictaphone equipment is a 160-channel system configured with five

transports mounted in two racks.

Four of the transports, each of 40 channels capacity, will handle the recording function of the system. The fifth transport is a standby unit.

In the unlikely event of failure, the system has been designed so that the recording function will be automatically switched to the standby transport.

The Dictaphone equipment is designed to permit as many as

six transports to be backed up by a single standby unit, thus saving space and money.

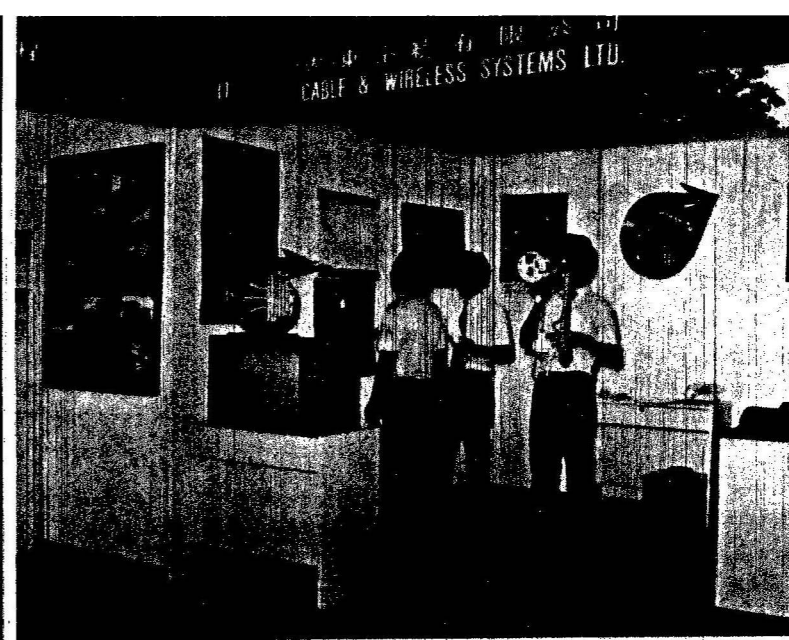

Dictaphone 168-CH voice communication loggers are now available from Systems in four, eight, 10, 20, 30, 40 and 60-Channel variants, according to Patrick Li, Senior Sales Engineer in the company's Telecommunications Products Department.

"The design is user friendly, and operation is by simple, finger tip control," Patrick told Systems News.

Dictaphone systems, he added, have been enjoying considerable success in the Hong Kong market. The Royal Hong Kong Police Force, the Fire Services Department, the Hongkong & Shanghai Banking Corporation, the Mass Transit Railway Corporation and Towngas are among major users.

## 新型电话录音系统 记录金融财务交易

刚统一的香港政券交易所新近安装了一套定达通5000系列160讯道电话录音系统, 准确地记录所有口头达成的金融

Systems' booth at the Guangzhou exhibition

财务交易, 并可显示录音时间。

这套定达通设备由五具主机组成, 分别由两具机架承载, 配置一百六十条讯道, 由大东系统供应, 安装在位于交易广场的香港政券交易所新址。

这系统其中四具主机各有四十条讯道, 能处理这系统的录音功能; 第五具主机则作后备之用。

发生故障时, 这系统的录音功能会自动转驳后备主机。

定达通设备体积细小, 一具后备主机可以支持六具主机, 故此亦可节省金钱。

定达通5000系列1600讯道声音通讯记录仪由大东系统代理发售。大东系统电信器材科高级工程师李志强说, 这系统有4、8、10、20、40及60条讯道, 可供选择。

「这系统采用按钮操作, 极为简易。」李志强告诉本通讯。

他并说定达通系统在香港

市场备受欢迎。香港皇家警务处、消防处、香港上海汇丰银行、地下铁路有限公司及香港煤气公司都是主要的用户。
